GRADING IN AN EASEMENT OR IDENTIFIED FLOODPLAIN AREA

ALWAYS REQUIRES A PERMIT. FEE: all sites: <= 200 cu yards \$100 >200 but < 500 cu yards \$125, 500 cu yards \$160 OVER 500 cu yards \$6 for each additional 100 cu yards or portion thereof. Provide the following:

1. Describe the land on which the proposed work is to be done by lot, block, tract, and street address, or similar description, which will readily identify and definitively locate the proposed work.
2. State the estimated dates for the starting and completion of grading work.
3. State the purpose for which the grading application is filed.
4. State whether or not a building, structure or other improvement, the construction of which will require a building permit pursuant to the provisions of the Building Code, is intended to be erected on the land on which the grading is to be done.
5. Include plans and specifications prepared, signed and sealed by a professional engineer, surveyor, architect or landscape architect, and shall accurately portray and describe the site and proposed soil erosion controls, if any. Four (4) sets of Plans shall be submitted, and shall include:
 - 5.1. The name of the applicant.
 - 5.2. The name of the owner of the land.
 - 5.3. The permission and approval of the owner of the property if the applicant is an agent or tenant of the landowner, by affidavit.
 - 5.4. An accurate location by lot, block, tract, street address, a location map or other similar information.
 - 5.5. A contour map showing the present contours of the land and the proposed contours of the land after completion of the proposed grading at two (2) foot intervals where the average slope is fifteen percent (15%) or less and at five (5) foot intervals where the average slope exceeds fifteen percent (15%).
 - 5.6. Cross-sections of the proposed cut or fill on fifty (50) foot intervals which show the method of benching both cut and/or fill; provided, however, that there shall be not less than two (2) cross-sections for each site.
 - 5.7. A plot plan showing the location of the grading boundaries, lot lines, neighboring streets, or ways, buildings, surface and subsurface utilities and waterways, drainage patterns and sufficient dimensions and other data to show all work. (Where grading is to be performed over or adjacent to existing utility lines, cross-sections shall include utility line elevations.)
 - 5.8. A description of the type and classification of the soil from the soil survey, other standard surveys, or other methods.
 - 5.9. Details and location of any proposed drainage, structures and pipes, walls and cribbing.
 - 5.10. Seeding locations and schedules, debris basins, diversion channels.
 - 5.11. A soil conservation report.
 - 5.12. If truck or trailer loads of soil are to be removed from or delivered to the site, a description of truck travel routes must be approved by the Borough. Evidence of approval from a State or County agency, where required, shall also be provided.
6. If proposed grading, excavation or fill is located entirely or partially within any identified floodplain area, a document, certified by a registered professional engineer or architect, which states that the proposed grading, excavation or fill has been adequately designed to withstand the one-hundred-year flood elevations, pressure, velocities, impact and uplift forces associated with the one-hundred-year flood and that the plans adhere to the restrictions of this Chapter. Such statement shall include a description of the type and extent of measures, which have been incorporated into the design of the grading, excavation or fill.
7. For projects having an estimated cost equal to or greater than \$25,000, a performance security is required in the amount of 110% of the estimated cost for the complete scope of work. An estimate may be calculated at \$2.00 per cubic yard of cut or fill, whichever is greater, plus the cost of erosion and sediment control. For projects having an estimated cost of less than \$25,000, a security in the amount of 50% of the estimate shall be posted.
